

Camel Power Club

Camel Power Club is a french indie act active since 2014, touring from Mexico to Eastern Europe. Reminiscent of LCD Soundsystem, it's a blend between late 60's British music and electronic textures. His synthetic sounds feel like a dream world above the clouds, in which the symbiosis of indie-electronic combines with the timbres of escapist narratives.

He started composing in 2014, with a first 4-track EP release "**Sputnik**". In 2017, he then released a more popish EP "**Baïkonour**", keeping the spatial theme at the core of his identity. In 2020, he returned to land and released a new 5-track EP "**Why Can't We All Be Friends for the Few Years Left ?**" : a new opus with brighter colors and tropical influences. In 2022, he dropped a new album "**Narukanaga**", supported by a sold out European tour in Spring and Fall that year.

Now crossing the **100 millions streams** milestone, he will return with a series of singles starting April 26, 2024, and drop his **new album on April 4th, 2025**, supported by a European tour in 2025.
