

Forbidden

40 Years Of Twisted Evil - European Tour 2025

While 2023 & 2024 have been landmark years for the rebirth Forbidden, 2025 is when things start heating up.

There are two anniversaries for the band... Twisted Into Form celebrates its 35th year since its release & Forbidden Evil was born 40 years ago!

That's right. In March of 1985 we played our first house party and I was 15 years young. 5 years later we released our second album, Twisted Into Form and embarked on a very memorable world tour with our Brothers in Death Angel.

To acknowledge & celebrate these two monumental events, Forbidden will be performing Twisted Into Form from front to back at every show or festival appear on.

It's going to be an emotional run for Matt Camacho and myself. We get to honor our former bandmates...the Late-Great Tim Calvert, Russ Anderson & Paul Bostaph. We had lightening in a bottle. The leap from Forbidden Evil to TIF was immense. It's crazy to think we recorded it when I was only 20 & Matt was 21. The babies of the band at that time.

Oh, and the most important news of all... We've been writing our 6th full-length release and hope to have it fully recorded and mixed by Summer on 25. That would mean it would be released before the end of next year. There WILL be new music!

These are things to look forward to for us and if you're a fan of Forbidden. Looking forward to sharing these significant anniversaries with the metal world in 2025!

Craig Locicero, July 2024
